Final_Exam_Roldan > web > tasks > main.yml > { } 4 > { } copy > dest

Ansible Tasks Schema - Ansible tasks file (ansible.json)

```yaml
- name: Install web server (Debian)
  apt:
    name: "{{ web_package.debian }}"
    state: present
    update_cache: yes
  when: ansible_os_family == "Debian"

- name: Install web server (CentOS)
  yum:
    name: "{{ web_package.centos }}"
    state: present
  when: ansible_os_family == "RedHat"

- name: Start service (Debian)
  service:
    name: apache2
    state: started
```

Final_Exam_Roldan > monitoring > tasks > main.yml > ...

```yaml
- name: Install dependencies (CentOS)
    state: present
  when: ansible_os_family == "RedHat"

# Simplified Nagios install
- name: Download Nagios
  get_url:
    url: https://assets.nagios.com/downloads/nagioscore/releases/nagios-4
    dest: /tmp/nagios.tar.gz

- name: Extract Nagios
  unarchive:
    src: /tmp/nagios.tar.gz
    dest: /tmp/
    remote_src: yes
```
